### Tokyo Trick Art Museum

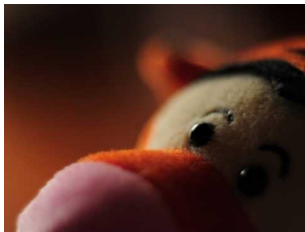

#### "Trickster Paintings"

Located on the 4th floor of DECKS Tokyo Beach, the Tokyo Trick Art Museum lures you in with funky displays and entrancing 3D artworks. There are many interesting paintings. These paintings will trick your sense of sight; it seems like you are climbing into them. Taking pictures is a good way to share that feeling with your friends and family. This museum also has a goods store, where you can buy many strange and funny items.

### Gundam Base Tokyo

#### "Immerse Yourself in the Gundam World"

Located on the seventh floor of the Diver City Tokyo Plaza, the Gundam Base Tokyo is where you can enjoy the Gundam (popular Japanese robot animation) world through many attractions, toys and exhibits. Avid fans of the popular franchise can attend workshops where they can work on creating their own Gunpla (model kits pertaining to the mobile suits) or they can traipse through the section which displays an array of Gunpla, the oldest one dating back to 1980. At the goods store, you can shop for exclusive goods.

### Meguro Parasitological Museum

#### "Vom Bandwurm zur Malaria"

Medizinwissenschaftler bedienen sich dieser Forschungseinrichtung, um die Experimente von Satoru Kamegai, dem Gründer dieser Einrichtung weiterzuführen. Im ersten Stockwerk kann man ungewöhnliche Insekten bewundern, die Krankheiten übertragen, während das zweite Stockwerk ganz im Zeichen von Parasiten steht. Zu den interessantesten Ausstellungsobjekten zählen Bandwürmer, die mehrere Meter lang werden können, sowie die umfassenden Informationen über Parasiten im Zusammenhang mit Malaria. Wenn man schon immer mehr über die Parasiteninvasion im eigenen Körper wissen wollte, ist man hier an der richtigen Adresse! Eintritt: Frei
