Scarborough Bluffs

"Stunning Cliffs"

Shaped by the elements over the course of millenia, the Scarborough Bluffs rise from the shores of Lake Ontario in East Toronto. The sheer face of the escarpment is a defining feature of the waterfront, rising to a height of 90 meters (300 feet) above the shore. Several parks span the 15-kilometer (9.3-mile) stretch of the Scarborough Bluffs as it traces the edge of the lake. While most of these are found perched atop its peaks, a few grant access to the narrow beach that lies at its base. The view from the top is notoriously astounding in beauty, although few can deny the striking quality of a more low-lying perspective with the barren rock face rising high above the tranquil water.
