Aura Spa

"A Soothing Invitation"

Aura Spa is most popular for its nail work and laser hair removal services. The soothing, sepia-toned interiors invite visitors inside and lead them to a tanning bed room and pedicure and manicure stations. The spa focuses a bit more on quality than quantity, and though it might not have an extensive spa service menu, the staff gives customers personalized attention. In addition to facials, manicures and pedicures, and other basics, visitors can also receive laser genesis therapy and a few other specialized services.

Riverside Spa

"Riverside Relaxation"

Riverside Spa is not so named simply because of its close proximity to the Bow River; the name is apt because of the serene setting it has managed to create, reminiscent of a relaxing riverside day. With facilities which are found at uber-luxurious resort spas, this is a spa that succeeds in presenting you with a thoroughly calming experience. The Raindrop Therapy Massage, in which therapeutic oils are applied on your body like little raindrops, is a wonderful way of relieving body tension. Body wraps like the Chocolate Bliss and Apricot Mango are almost good enough to eat! You could make a group booking and enjoy an invigorating day out with friends or family.
