### Stadtkino

#### "New Cinema at the Kunsthalle"

The Stadtkino or city cinema is a truly eclectic place, which is devoted to screening films that are good, exciting and interesting. The cinema itself is pitchblack so light doesn't stand a chance when it tries to sneak in. As most of the guests are movie buffs who relish the black and white and technicolor films shown, this isn't the kind of movie theater where you'll find people talking and being noisy. All screenings start punctually and there are no trailers. The films shown are usually not newly released; instead, the focus is on particular topic areas. The Kunsthalle also holds something here every two weeks.

### Neues Kino

#### "A Backyard Cinema"

Neues Kino is the only cinema that shows proper trash films such as all of those made by Ed Wood. Fifties science fiction, vampire films and other culturally interesting films also find an outlet here. The cinema's interior is as eclectic as the films screened, everything is home made and interested parties have to make their way to a backyard in Kleinhühnigen first. The 'Neues Kino' is ambitious and interesting and unknown masterpieces can be discovered here on a regular basis. Come here and you will certainly be one step ahead of the general public! Check website for details.
