Teatro alla Scala

"An Opera Legend"

Dating back to 1778 as a fitting replacement for the Teatro Ducale, the stately Teatro Alla Scala has since come to be one of opera's most legendary venues. The historic theater has hosted most of Italy's operatic masters alongside renowned international artists. Designed by noted architect, Giuseppe Piermarini, the theater's neoclassical facade has a palatial theater with six tiers of private boxes, topped by an intricate ceiling. Home to the prestigious La Scala Theater Orchestra, La Scala Theater Ballet and La Scala Theater Chorus, it remains one of the city's liveliest cultural venues. Apart from operas, the theater also hosts plays, ballet shows and numerous other cultural events throughout the year.

Arena Gianni Brera

"Neoclassical Sports Grounds"

Deliberately located in the restructured Castello Sforzesco area in order to provide a stable home for festivities and celebratory events for the Repubblica Cisalpina and the new Regno d'Italia, the Arena Civica was designed by The neoclassical architect Luigi Canonica in 1805 at the north eastern end of the Parco Sempione. Built with materials taken from the castle ruins and modeled on Roman amphitheaters, the Arena has an elliptical floor with four main entrances: to the south-east stands the Triumphal Arch in granite framed with two pairs of golden columns; opposite this is the Porta delle Carceri flanked by two towers, as found in roman models. On the north eastern side is the Porta Libitina and on the south west the Loggia Reale which has a monolithic Corinthian column in granite. Now used as a sports ground, the elegant construction has seen some changes this century to increase spectator capacity, transforming the terraces. The characteristic curtain of trees that ran alongside the terraces was also removed and the channel that wound along the stalls and brought canal water in also allowed the passage of famous 'naumachie'.
