Auckland Zoo

"Up And Close With Animals"

Auckland Zoo has committed itself to improve the living quarters of New Zealand's largest collection of native and exotic animal species. Now you feel as though you are walking with the rare white rhinos on the Pridelands, swinging with the monkeys through the McDonald's Rain forest and almost swimming with the inhabitants of Hippo River. There are picnic facilities and a café. The zoo has outreach and educational programs for both visitors and local groups and is available for corporate and private functions.

Auckland Botanic Gardens

"Super Collection of Natives & Exotics"

This 65 hectare garden opened in 1982 and has become Auckland's premier horticultural showcase. With a full selection of New Zealand native plants and trees, the Botanic Garden is an excellent venue in which to learn about the environment and the part that plants play. There are a number of self-guided tours complete with information signs that fully explain the plantings. For exotics, the camellias and roses are especially well represented. The gardens are just off the Manurewa exit off the Southern motorway. Come springtime, the Gardens see the Ellerslie Flower Show.
