Hyannis Whale Watcher Cruises

"A Breathtaking Experience"

A whale watch is a must when visiting Cape Cod. Step aboard a 100-foot boat and travel past the Cape Cod National Seashore to the open ocean. The boats concentrate on an area known as the Stellwagen Bank - a deep fissure in the ocean floor that is home to a favorite whale delicacy, the sand eel. Naturalists narrate during the cruises. There is a snack bar on board and passengers can bring their own picnic. The trip takes about four hours.

Heritage Museums & Gardens

"A Collection of Americana"

Formerly served as plantations, today, they are a complex of museums devoted to early American life. The art museum contains antique toys and the largest collection of Currier and Ives lithographs in the United States of America. Featuring incredible exhibits, some popular ones are a 1912 carousel that is a favorite with children, a replica of a Shaker roundhouse containing antique cars, and Antique firearms and uniforms on display in the Military Museum. Charles Dexter, the original owner, spent years here planting and perfecting varieties of rhododendrons. Please note the museum and gardens are open seasonally.

Scargo Tower

"A Hill with a View"

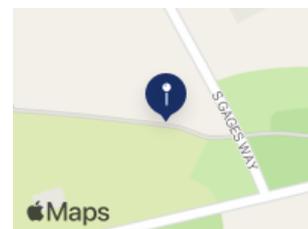

This brick tower is not remarkable for its architecture; it does, however, have a great view. Located on top of the 160-foot (50-meter) Scargo Hill in Dennis (the highest point on the Cape), a clear day allows views of the Provincetown Monument and mainland Massachusetts. In almost any weather condition you can see Scargo Lake, which was named after a Native American princess. You may find it a romantic spot too, especially for sunsets and star gazing.

Plimoth Plantation

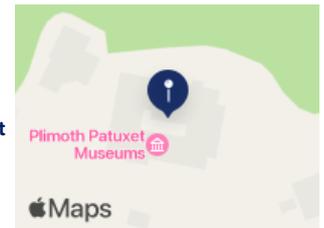

"See How the Pilgrims Lived"

This living museum recreates Plymouth as it was in 1627, and does a great job at separating fact from the enduring (and completely inaccurate) legend of the First Thanksgiving. Historians and curators have paid great attention to detail, from the street plans to furniture, tools, and cooking equipment. Specially bred 17th-century livestock occupies the barns and pastures, and trained reenactors and artisans demonstrate how life was lived among the Pilgrims. In addition to information on the European colonists, visitors can find information on the Native American population at Hobbamock's Homesite. Hobbamock, a Wampanoag Indian, lived with his family in Plymouth from 1621-1641, as part of a peace treaty agreement. The plantation is open seasonally.

Pilgrim Monument

"Towering View Moving Tribute"

Few people know that the pilgrims first struck land in Provincetown, on November 21, 1620, before continuing on to Plymouth. While anchored in Provincetown Harbor, the Pilgrims signed the Mayflower Compact, dedicating themselves to a community governed by democratic rule. This tower was built in 1910 to commemorate that landing, was modeled after the clock tower of the Palazzo Pubblico (specifically the Torre del Mangia) in Siena, Italy. A climb to the top affords one of the best views on the entire Cape, and the tower also incorporates the Provincetown Museum.

Provincetown

"History, Art & Leisure"

Provincetown, one of the most scenic towns on Cape Cod, is a treasure trove of culture, art, and history. The Pilgrims made their first New World landing here, and the historic Mayflower Compact was written and signed just off the coast. Later, an artists' colony began to flourish, attracting the intellectual elite and resulting in the establishment of many artistic and literary institutions. Today, Provincetown thrives as a cultural center and vacation destination and offers much in the way of leisure and exploration. Be it museums, historic landmarks, or the sun-dappled beaches that elevate its touristic appeal, plenty of memorable experiences await visitors. Also popular with the LGBTQ+ community, and with something new brewing each season, Provincetown makes for an exhilarating visit.
