Soul Vegetarian #1

"Affordable African Cuisine Near Campus"

This is a small, mostly student hangout offering healthy soul food. The stated specialty is delicious, cholesterol-free cooking, and they do a pretty good job of it, and a pretty good business. It's no wonder this place is so popular with local students, as all meals are priced fairly low. The interesting menu at this low-key joint isn't for everyone, however, unless you have a taste for soy ice cream with your collard greens.
