Manuel Correllus State Forest

"Popular Recreational Park"

This state park in Vineyard Haven is truly a natural wonder. The park consists of more than 5,000 acres (2,023 hectares) and is located in the center of the island. In the early 20th century, the park was established as a reserve dedicated towards the protection of Heath hens, a now extinct, specie of the Greater prairie chicken family. Today, the park is used for recreational purposes such as hiking, cross country skiing, cycling, horseback riding and more. There are picnic areas, rest rooms and showers available. A large environmental restoration project is underway in an attempt to revive the native grassland ecosystem.
