### Faraday Museum

#### "The History of Science"

A world of intrigue and amazement awaits you at the Faraday Museum. Housed within the Royal Institution (RI), the museum lies sprawled across three levels, chronicling the long and illustrious history of the RI. On the lower ground level you will encounter the numerous devices, inventions and innovations that were used and created by the brilliant scientists of the RI, alongside interactive exhibits that encourage experimentation. On the ground level learn more about the scientists and personalities who put the RI on the map and contributed to the advancement of science and technology. The RI has hosted lectures by several renown scientists from around the world over the years and the first floor is where you will find a record of these special events. Props, photographs and film clippings are exhibited here. Of the many intriguing and ingenious exhibits housed within the Faraday Museum, Faraday's Magnetic Lab from the 1850s is perhaps the most popular, offering a glimpse into the life and work of the museum's namesake. Whether you are a science buff or not, you will find much that captures your imagination at the Faraday Museum.

#### "No Anaesthesia!"

Above Saint Thomas Church in Southwark is London's oldest surviving operating theater. Built in 1821, it was the scene of many amputations carried out with a saw and no anaesthetic. Blood would drip - or probably pour - off the wooden table and get soaked up by three inches of sawdust. One wonders what the congregation below would have thought of the screams emanating from upstairs, with the odd drip of blood seeping through the ceiling. With anesthetics unavailable, patients would often awake from their drunken state (they had a choice of passing out from either alcohol or pain) in the midst of an operation. Fortunately, the National Health Service's operating theaters have taken a leap forward, and medical students don't have such a frighteningly free reign.

### Science Museum

#### "World of Science"

With its expansive floors, the Science Museum allows one to explore the history of technology and glimpse into the future. Starting at the crowd-favorite gallery, Wonderlab, where you learn the laws of science, you can move through a vast array of interactive galleries which demand audience participation. From medical history to nuclear physics, the museum has got it all covered. Challenging the perception among many children that science is boring, the multitude of things to press, touch, watch and think about, make this museum a firm favorite with the kids. A popular

attraction is the IMAX cinema, where you can enjoy interesting 2D and 3D films.

## Natural History Museum

"Um dos Museus Mais Populares da Cidade"

Explore a história natural do planeta desde a época pré-histórica até aos nossos dias num dos mais visitados museus de Londres. Em 1881, o Museu de História Natural mudou-se para a sua actual sede. Desenhado por Alfred Waterhouse, este edifício é hoje um dos mais bonitos e famosos de Londres. Seus respeitosos vestíbulos hoje abrigam mais de 300 anos de coleções, com mais de 68 milhões de exemplares de espécies. Amplamente divididas em duas galerias a "Vida" e "Galeria Terra", o museu oferece muito mais do que pode ser visto num dia, e seus pés vão cansar antes do seu cérebro. Deixe os seus filhos correrem entre os esqueletos de dinossauros, vulcões em erupção e reconstruções das baleias azuis em tamanho real, é muito pouco provável que as crianças vão esquecer a primeira vez que estiveram aqui.

## Royal Observatory Greenwich

"Tempo e Espaços Adequados"

Desenhado por Christopher Wren, o Observatório foi fundado em 1675 para calcular de modo exato as longitudes, utilizando a astronomia para fins de navegação. No entanto, por volta do ano de 1948 Londres havia-se tornado demasiadamente luminosa, de modo que não era o melhor lugar para analisar as estrelas. Então, os astrônomos mudaram-se para Sussex. Agora, o Velha Observatório Real é parte do Museu Nacional da Marinha. Descubra a história da pesquisa das longitudes, a história do tempo e da navegação, estando na linha em que o leste encontra o oeste e no ponto onde começou o milênio. A entrada é gratuita; algumas pequenas quantias podem ser cobradas no caso das exposições e eventos especiais.
