Monumento de Washington

"City's Signature Monument"

The symbol of the city of Washington DC, this 555-foot (169-meter) marble obelisk on the National Mall honors the nation's first president, George Washington. The cornerstone of the Washington Monument was laid in 1848, but it was fully constructed only in 1884. One can witness a visible change about one-third of the way up the obelisk marble - evidence of the onset of the Civil War. Construction was stalled during the war, and when the builders returned to the same quarry to complete the project afterward, enough time had passed to cause a significant change in the color. It is an emblem of the United States and an icon of the nation; the Washington Monument is a moving sight, its elegant form mirrored in the Reflecting Pool of the Lincoln Monument nearby.

Mount Vernon

"George Washington's Home"

From beneath the 90-foot (30-meter) portico, lies an expanse of sloping lawn along the Potomac River as it flows past Mount Vernon. This 17th-century plantation house was once home to the first President of the United States, George Washington. The property was originally owned by Washington's father, Augustine, and George replaced a smaller, more modest home with Mount Vernon when he came into the property, beginning in 1758. Today, costumed guides narrate the history of the elegant mansion and of the surrounding buildings, which have been preserved to reflect the days when the first president resided here. The state also features tours around the 500-acre (200-hectare) estate, including its surrounding buildings, and historic exhibits that recreate farming techniques and colonial games.
